FIELD 6431, BOLTON LOW HOUSES, WIGTON***Field 6431, Bolton Low Houses, Wigton, Cumbria. Archaeological Evaluation***

Jones, E Edinburgh : Headland Archaeology Ltd, 2002, 8pp, figs, tabs

Work undertaken by: Headland Archaeology Ltd

The line of a Roman Road (SMR 10627) was considered to have its course in the vicinity of the site. Eight trenches were excavated, representing 3% of the development area. A modern mains sewer and a shallow gully reflected the orientation of the modern field system. No other archaeological remains or finds were encountered and no further work was recommended. Hughes, V Lancaster : Oxford Archaeology North, 2002, 59pp, colour pls, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

An evaluation, consisting of two trenches, was carried out on the site to determine the state of preservation of any archaeological remains. The evaluation demonstrated that the level of truncation from modern features was high and that the surviving features were all of post-medieval date. [Au(abr)]

HOLBECK PARK AVENUE, BARROW-IN-FURNESS*Holbeck Park Avenue, Barrow-In-Furness, Cumbria*

Heewood, R Lancaster : Oxford Archaeology North, 2002, 66pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

The field evaluation involved the use of a mechanical excavator to open 24 evaluation trenches. A relatively low density of features of archaeological interest were encountered, comprising a pit in Trench 5, a large pit (probably a tree-throw hole), three irregular features, two possible pits or ditch terminals. The probable tree-throw hole contained 106 sherds of early Neolithic pottery together with 40 fragments of struck flint, a single seed of carbonised grain, carbonised hazelnut shells, and a considerable quantity of charcoal. It was recommended that the remainder of the feature was excavated and that an area around the tree be excavated. [Au(abr)] *SMR primary record number:* 2948

EARTHWORKS NEAR NEWBY HALL, PENRITH

Medieval and Later Earthworks Near Newby Hall, Newby, Penrith, Cumbria

Dunn, C York : English Heritage, 2002, 35pp, colour pls, figs, refs

Work undertaken by: English Heritage

The survey found evidence for a complex palimpsest of earthworks within this block of land, including features interpretable as holloways, possible pillow mounds, traces of ridge-and-furrow cultivation, terraced-ways, and remnants of enclosure boundaries. These features seemed to relate more to the development of the village and past agricultural land use, than to a designed ornamental landscape. [Au(abr)]

LAND ADJACENT TO OAKDENE, MELKINTHORPE

Land Adjacent to Oakdene, Melkinthorpe, Cumbria

Hughes, V Lancaster : Oxford Archaeology North, 2002, 55pp, colour pls, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

The evaluation consisted of two trenches, indicated that there were three potentially significant archaeological features. Trench 1 contained the remains of a probable foundation slot, and possible pit, whilst Trench 2 had a possible boundary ditch. All three features contained pottery dated throughout the medieval period, implying uninterrupted occupation of the plot. The evaluation has shown that in favourable conditions deposits and/or features of medieval date did survive in a good state of preservation. It was recommended that the remains are left undisturbed. [Au(abr)]
