LORD STREET, ECCLESTON*Lord Street, Eccleston, Lancashire*

McPhillips, S Lancaster : Oxford Archaeology North, 2002, 27pp, figs, tags, refs

Work undertaken by: Oxford Archaeology North

The excavation of eight 20m x 2m trenches revealed no significant archaeological deposits in any of the trenches. Deposits interpreted as buried ploughsoil and drainage features with a range of post-medieval finds and a single Roman sherd were recorded. [Au(adp)] *SMR primary record number:* 3224

PRIORY FARM, PRIOR LANE, HORNBY*Priory Farm, Priory Lane, Hornby, Lancashire*

Bagwell, M Lancaster : Oxford Archaeology North, 2002, 25pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

The work consisted of the excavation of three trenches. No archaeological features were detected in any of the trenches, but a small assemblage of worked flint and chert, of tentative Late Mesolithic/Early Neolithic date, together with two joining heavily abraded sherds of Roman pottery, was recovered from the subsoil in the northern part of Trench 1. [Au(abr)] *SMR primary record number:* 3225

LONGRIDGE ROAD, PRESTON*Longridge Road, Preston, Lancashire*

Hughes, V Lancaster : Oxford Archaeology North, 2002, 28pp, colour pls, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

Five trenches were excavated to try to detect the Roman Road. However, in none of the five trenches was there any indication of the Roman Road surviving. The conclusion is that the railway and modern road systems may have contributed to the destruction of the Roman Road and, in addition, the use of the land in the recent past as a playing field may have involved full-scale stripping. A linear ditch may have been of a relatively early date but was absent of finds. A clinker filled trackway headed toward the railway and was clearly of post-medieval date. Post-medieval drainage systems were also encountered.[Au(adp)] *SMR primary record number: 3230*
