FIELDWAYS, RUSSELL ROAD, BASINGSTOKE*Fieldways, Russell Road, Basingstoke, Hampshire*

Pine, J Reading : Thames Valley Archaeological Services, 2002, 13pp, colour pls, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

An extensive feature, thought to be a hollow or less likely a quarry, was identified at the site. Small quantities of medieval pottery, residual worked flint, tile and oyster shell were all present in this feature. The presence of prehistoric flint and pottery suggested activity from this time. The nature of development meant that the feature could be preserved in situ. [Au(adp)]

CLANFIELD POND, CLANFIELD*An Archaeological Field Evaluation at Clanfield Pond, Clanfield, Hampshire*

Southern Archaeological Services Southampton : Southern Archaeological Services, 2002, 18pp, colour pls, figs, tabs, refs

Work undertaken by: Southern Archaeological Services

The evaluation was carried out to investigate the antiquity of the pond, which was thought to be a Saxon mere despite significant 20th century alterations. Two trenches were excavated, which succeeded in finding a former edge of the pond. It was deduced that the southern side of the pond was disturbed or re-excavated in the mid to late 20th century. FARRINGDON MANOR, UPPER FARRINGDON*An Archaeological Evaluation at Farringdon Manor, Upper Farringdon, Hampshire*

Currie, C K : CKC Archaeology, 2002, 19pp, colour pls, figs, tabs, refs

Work undertaken by: CKC Archaeology

The evaluation was carried out in advance of the development of a swimming pool and terrace. A small ditch of possible medieval date was located, orientated east-west across the approximate centre of the area. No trace of buildings noted on early documents were found, leading to the assumption that they were perhaps flimsy wooden structures. [Au(adp)]

Davis, B Salisbury : Wessex Archaeology, 2002, 19pp, figs, tabs, refs

Work undertaken by: Wessex Archaeology

All the trenches excavated contained features. The earliest included a shallow 13th century pit containing ashy deposits, perhaps relating to a disastrous fire. A possible medieval ditch was interpreted as a former property boundary. The rest of the features were mainly 17th and 18th century in date, including a waterlogged channel with wooden revetments and several pits, perhaps relating to gravel quarrying. A watching brief was recommended. [Au(abr)]

THE FRIARY, 19 ST CROSS ROAD, WINCHESTER***Summary Report on a Field Evaluation at The Friary, 19 St Cross Road, Winchester***

Southern Archaeological Services Southampton : Southern Archaeological Services, 2002, 80pp, figs, tabs, refs

Work undertaken by: Southern Archaeological Services

The purpose of the evaluation was to try and establish the archaeological potential of the site. A truncated feature containing Roman pottery was located, as well as some uncharacterised Saxon activity indicated by pottery. Evidence of early medieval occupation and cultivation was found, as well as what was probably the church and east cloistral range of the Friary in the high to late medieval

South East Region

period. Graves predating and post-dating the floor of the church were recovered, as well as a contemporary ditch. Pits and a floor demonstrated post-medieval activity. Evidence associated with the Dissolution was abundant. Subsequent use of the site was thought to be horticultural, before truncation occurred in the 19th or 20th century. [Au(abr)]
