CHRISTCHURCH SCHOOL, ASHFORD*An Archaeological Evaluation at Christchurch CE [Aided} High School, Millbank Road, Kingsnorth, Ashford, Kent*

Kendall, G Hassocks : Archaeology South-East, 2002, 10pp, figs, tabs, refs

Work undertaken by: Archaeology South-East

One of the two trenches at this site contained evidence of Mid to Late Iron Age activity in the form of a single east-west linear gully, as well as several adjacent pits and postholes. The shallow nature of the features indicated that they had suffered badly from cultivation in the past. [Au(abr)]

TAYLOR'S GARAGE, BRIDGE STREET, WYE*An Archaeological Evaluation at Taylor's Garage, Bridge Street, Wye, Kent*

Griffin, N Ditchling : Archaeology South-East, 2002, 21pp, figs, tabs, refs

Work undertaken by: Archaeology South-East

A large number of post-medieval features were recorded, including ditches, gullies, cess/rubbish pits, post holes and a brick-lined drain. A medieval drain and contemporary ditch and gully were also noted. A map of 1746 suggested that a building stood on the site at this time, and many of the features may relate to this and extant adjoining properties. [Au(abr)]

8 ST MARY'S STREET, CANTERBURY*Archaeological Evaluation on land at 8 St Mary's Street, Canterbury*

Helm, R Canterbury : Canterbury Archaeological Trust, 2002, 15pp, figs, tabs, refs

Work undertaken by: Canterbury Archaeological Trust

Remains of significant archaeological potential were discovered during an evaluation in advance of a proposed residential development. A Late Iron Age north-south aligned ditch, overlain by a clay floor with drainage gullies and post holes was located. A metalled street surface between two known Roman streets was also noted. A series of post holes defined a substantial timber building of Roman date. These features were sealed by a clay floor containing pottery dated to the late 1st and early 3rd centuries. A layer of garden soil containing finds dating from the Late Iron Age to post-medieval periods was detected, and thought to confirm this area as waste ground, orchards and gardens from the medieval period onwards. [Au(abr)]

HERNE BAY HIGH SCHOOL

Herne Bay High School, Herne Bay, Kent. An Archaeological Evaluation

Wotherspoon, M & Hounsell, D Hertford : Hertfordshire Archaeological Trust, 2002, 18pp, figs, tabs, refs

Work undertaken by: Hertfordshire Archaeological Trust

Previous phases of evaluation, observation and recording at this site had revealed archaeological features, predominantly of Late Iron Age to Roman date. Earlier activity was also indicated. A complex landscape had been identified nearby. This watching brief confirmed the continuation of features of probable Late Iron Age/early Roman date in the south-east corner of the site. A linear feature was thought to be a continuation of a trackway/holloway excavated to the south east of the school. [Au(abr)]

Parfitt, K Dover : Dover Archaeological Group, 2002, 13pp, figs, tabs, refs

Work undertaken by: Dover Archaeological Group

The evaluation was in advance of tree planting in the field. Fieldwalking exercises the previous year had located evidence of occupation. 38 features were revealed in this exercise, most undatable post holes. However, a four-post structure with flint packing stones was located, tentatively dated to the Late Iron Age by a single sherd, and the fact that it was not aligned with later Roman structures. A group of parallel ditches was thought to relate to a narrow ditched trackway. Gullies were also present. In total, the features represented a landscape from the prehistoric to medieval periods. [Au(adp)]

LYMINGE ANGLO-SAXON CEMETERY*Report on Evaluation Trenching at Lyminge Anglo-Saxon Cemetery*

Parfitt, K Dover : Dover Archaeological Group, 2002, 8pp, figs, tabs, refs

Work undertaken by: Dover Archaeological Group

The evaluation was carried out in advance of a proposed equestrian arena in an area close to a known Anglo-Saxon cemetery, of which the limits had not been completely defined. A total of 43 certain or probable graves were encountered, including two cremation burials, rarely found in east Kent. Metal detector sweeps of all the unexcavated graves gave clear indications of grave-goods in some cases, although no attempt was made to excavate them. Post holes, ditches and gullies were also present at the site. The cemetery was thought to now contain well over 500 bodies. Pottery from the site produced a tentative date of AD 5th-6th century. It was suggested that the arena should be built over the cemetery, thereby protecting it. [Au(abr)]
