51-61 BAKER STREET, WEYBRIDGE*Report on an Archaeological Evaluation at 51-61 Baker Street, Weybridge, Borough of Elmbridge, in the County of Surrey*

Single, A London : Compass Archaeology, 2002, 50pp, colour pls, figs, tabs, refs

Work undertaken by: Compass Archaeology

An archaeological evaluation was undertaken in response to a condition upon planning permission, lying as it did within the boundaries of Weybridge's archaeological priority zone. Six trenches were dug on the site including one that contained a brick-lined domed well of 19th or early 20th century date, walls from housing that stood on the site between the 1930s and the 1960s, the base of an earlier brick-lined drain, a number of dark-filled features of Victorian date and two ditches containing fragments of Early Surrey ware (1050-1150). Several narrow gullies of post-medieval date implied continued use, as did the sequence of post-medieval buried hearths recorded. Also found was a fragment of Tudor stove tile, possibly from the nearby site of Oatlands Palace and evidence of settlement from the 18th century onwards. [Au(abr)]

LAND AT 63A-65B OATLANDS AVENUE, WEYBRIDGE*Land at 63A-65B Oatlands Avenue, Weybridge: an Archaeological Evaluation of the Proposal Area*

Shaikhley, N Woking : Surrey County Archaeological Unit, 2002, 6pp, figs, tabs

Work undertaken by: Surrey County Archaeological Unit

An archaeological evaluation, comprising the excavation of eight trial trenches, was undertaken in advance of the proposed redevelopment of the site. No features or finds of archaeological interest were revealed. Some disturbance was noted owing either to modern or early 20th century service pipes and soakaways or to old tree roots. [Au(adp)]

19 HIGH STREET, REIGATE*An Archaeological Evaluation at 19 High Street, Reigate, Surrey*

Wragg, E London : Pre-Construct Archaeology Ltd, 2002, 31pp, figs, tabs, refs

Work undertaken by: Pre-Construct Archaeology Ltd

South East Region

An archaeological evaluation was undertaken in advance of the construction of a new building. Two trial trenches were dug measuring up to 2m long by c.2m wide. These revealed archaeological deposits of medieval and post-medieval date. Trench 1 revealed two walls associated with the cellar of a 19th century brewery and the 20th century rubble with which it was backfilled during the demolition of the building. Trench 2 revealed a series of layers above the natural Lower Greensand of which the lowest contained two sherds of pottery of 13th century date. The succeeding layers contained pottery and ceramic building material of post-medieval date. [Au(abr)]

LAND AT WELLS PLACE, MERSTHAM, REDHILL

An Archaeological Evaluation Carried Out at Land at Wells Place, Merstham, Redhill, Surrey

Palmer, D Twickenham : AOC Archaeology Group, 2002, 10pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

An archaeological evaluation was undertaken in advance of the proposed erection of a new industrial unit. The evaluation involved the opening of three, machine-excavated trenches distributed across the development area. No archaeological features or horizons were recorded in any of the trenches. The natural across the site was gravel beneath brickearth. [Au(abr)]

BRIDGE WHARF, CHERTSEY

Bridge Wharf, Chertsey, County of Surrey. An Archaeological Evaluation Report

Cowan, C London : Museum of London Archaeology Service, 2002, 55pp, figs, tabs, refs

Work undertaken by: Museum of London Archaeology Service

An archaeological evaluation was undertaken in advance of the residential redevelopment of the site. A series of soils and prehistoric potsherds which were found of similar date, Late Bronze Age, to the spearhead and sword. Medieval pottery dated 1230-1400 was recovered from the topsoil/subsoil interface in some of the northernmost trenches. The only evidence for post-medieval structures was part of a 19th century brick wall footing, a robbed Victorian river wall and a slipway with railway lines. It was recommended that any need for further action be reviewed with the Local Planning Authority once more detailed design information are available. [Au(abr)]

MEAD LANE, CHERTSEY*Proposed Development at Mead Lane, Chertsey, Surrey*

AOC Archaeology Group Twickenham : AOC Archaeology Group, 2002, 18 pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

An archaeological evaluation was undertaken on the plot of land currently occupied by a caravan park south of Mead Lane Chertsey. The evaluation involved the opening of thirteen, machine-excavated trenches distributed across the development area. No archaeological features were recorded in any of the trenches. The natural across the site was gravel beneath alluvial clay. One further trench, opened to examine palaeoenvironmental data, suggests that human activity in the prehistoric period in this area was characterised by cultivation of cereals, though no direct evidence for related human activity was established. FARNHAM QUARRY (RUNFOLD FARM)*An Archaeological Evaluation of Part of the Stage 2 Area at Farnham Quarry (Runfold Farm), Surrey, in May 2002*

Hayman, G Woking : Surrey County Archaeological Unit, 2002, 7pp, figs, refs

Work undertaken by: Surrey County Archaeological Unit

South East Region

An archaeological evaluation was undertaken in order to examine the archaeological potential of an area of ground lying to the south of a substantial Iron Age and Roman site excavated in 1999/2000, and east of an area that was evaluated in 2001 that produced negative results. The evaluation resulted in the discovery of parts of six ditches, four of which were, or seemed most likely to have been of 18th century or later date, while the remaining two were of probable Roman origin. The paucity of finds recovered from these features suggested that they probably occurred some distance away from any area of dense contemporary occupation, and seemed most likely to have been agricultural boundaries. It seemed unlikely that significant archaeological information would be discovered by further fieldwork in this area. [Au(abr)]

PRINCESS ROYAL PUBLIC HOUSE, GUILDFORD ROAD, RUNFOLD

An Archaeological Evaluation of the Proposed Hotel Development at the Princess Royal Public House, Guildford Road, Runfold, Surrey

Dover, M Woking : Surrey County Archaeological Unit, 2002, 8pp, figs

Work undertaken by: Surrey County Archaeological Unit

An archaeological evaluation was undertaken in advance of the construction of a hotel. No archaeological features of any antiquity were present. However, the restricted nature of the trial trenching meant that an adequate sampling of the area was not achieved. In view of the remaining archaeological potential of the untested areas of the site, it was recommended that an archaeological watching brief be undertaken on the groundworks associated with the redevelopment of the site. THE FRENESHAM TO ALDERSHOT GAS PIPELINE ROUTE

Field Reconnaissance of the Proposed Route of the Frensham to Aldershot Gas Pipeline

Dover, M Woking : Surrey County Archaeological Unit, 2002, 26pp, colour pls, figs

Work undertaken by: Surrey County Archaeological Unit

A field reconnaissance survey was undertaken along the proposed route of the Frensham to Aldershot Natural Gas Pipeline. No unexpected archaeological discoveries were made along the proposed route of the pipeline. Though conditions were not ideal, further relevant features were identified, but none of these need necessarily be affected by the proposed route, with the possible exception, of Feature F, an area of archaeological investigation which revealed dense Iron Age occupation set within ditched enclosures and with evidence of contemporary field systems incorporating double ditched trackways. The archaeological watching brief of the easement strip and pipe laying should be more than adequate to identify any further archaeological features or artefacts. [Au(adp)]
