**BAILIFFSCOURT HOTEL, CLIMPING***An Archaeological Evaluation at Bailiffscourt Hotel, Climping, West Sussex*

Archaeology South-East Ditchling : Archaeology South-East, 2002, 27pp, figs, tabs, refs

*Work undertaken by:* Archaeology South-East

Four evaluation trenches and one contingency trench were excavated prior to the construction of additional accommodation (Area A) and two evaluation trenches were excavated at the site of a new leisure pool/spa (Area B). Area A revealed the presence of two 1st to 2<sup>nd</sup> century AD Romano-British ditches and a further ditch found to contain a probably residual prehistoric pottery sherd. Area B revealed a shallow sided feature that contained 18th to 19th century material and a discrete dump of flint cobbles in the upper part of its backfill and a single late 13th to early 14<sup>th</sup> century pottery sherd and peg tile fragment within the lower part of its fill. The base of this feature was not established due to its depth, and its full extent and form was not resolved. [Au(abr)]

**BOGNOR COMMUNITY COLLEGE, WESTLOATS LANE, BOGNOR REGIS***An Archaeological Evaluation at Bognor Community College (Lower School), Westloats Lane, Bognor Regis, West Sussex*

Archaeology South-East Ditchling : Archaeology South-East, 2002, 18pp, figs, refs

*Work undertaken by:* Archaeology South-East

A single L-shaped 27m long trial trench was mechanically excavated at the site. One, potentially prehistoric, shallow gully was exposed in the base of the trench and sampled. A probable pit was exposed in section. The features were not thought to be indicative of a dense area of archaeological activity. [Au]

**PRIORY FARM, TORTINGTON, ARUNDEL*****An Archaeological Evaluation at Priory Farm, Tortington, Arundel, West Sussex***

Griffin, N Ditchling : Archaeology South-East, 2002, 16pp, figs, tabs, refs

*Work undertaken by:* Archaeology South-East

The evaluation at the proposed site of a new garage revealed a substantial east-west aligned wall with a brick and ceramic tile fireplace. The works indicated that remains of the monastic precinct survived below ground in this area. A stone floor was also located. Pottery indicated that the building was levelled no later than 1575.

**WATERFORD GARDENS, CLIMPING***An Archaeological Evaluation at Waterford Gardens (formerly Fordacres), (Phase 2), Horsemere Green Lane, Climping, West Sussex*

Archaeology South East Ditchling : Archaeology South-East, 2002, 17pp, figs, tabs

*Work undertaken by:* Archaeology South-East

Nine trenches were mechanically excavated at the site to a cumulative length of 230m. Seven of these trenches produced potentially Bronze Age features, mostly gullies, with some slightly more intensive archaeological activity, including some Bronze Age pits, towards the south of the site. A linear feature, probably corresponding to a post-medieval field boundary was also identified aligned east-west across the south of the site as were a few Roman field boundaries. [Au]

**LAND PROPOSED FOR DRAYTON SOUTH QUARRY, Oving***An Archaeological Evaluation of Land proposed for Drayton South Quarry, Oving, West Sussex*

Priestley-Bell, G Ditchling : Archaeology South-East, 2002, 50pp, figs, tabs, refs

*Work undertaken by:* Archaeology South-East

A total of 78 trenches were excavated in advance of the proposed quarry. Middle and Late Bronze Age remains were found along the line of a relic watercourse, together with a possible burnt mound. Ten probable Roman ditches were thought to represent agricultural activity. Post-medieval/modern remains included two trackways and possible field boundaries. [Au(abr)]

**YEOMAN WAY, DURRINGTON**

*An Archaeological Evaluation at Yeoman Way, Durrington, Worthing, West Sussex*

James, R Ditchling : Archaeology South-East, 2002, 13pp, figs

*Work undertaken by:* Archaeology South-East

One 30m trench was mechanically excavated on a plot of land off Yeoman Way, Durrington, West Sussex, in advance of a proposed access road. One archaeological feature was observed cut into the underlying Brickearth, a ditch of modern date containing tile and bottle glass. No further archaeological features or deposits were observed, although several pieces of fire-cracked flint and one sherd of probable Late Bronze Age/Early Iron Age pottery were recovered from the upper surface of the Brickearth. [Au]
