37 ELM LANE, LOWER EARLEY**37 Elm Lane, Lower Earley, Reading, Berkshire. An Archaeological Evaluation**

Challis, C & Pine, J Reading : Thames Valley Archaeological Services, 2002, 11pp, colour pls, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

One small sherd of Roman pottery was recovered, along with three possible features, two possible pits and a possible post hole. These features were undatable, and it was doubtful whether they were of human origin. [Au(adp)]

90-93 BROAD STREET**90-93 Broad Street, Reading, Berkshire. Archaeological Evaluation Report**

Thomason, D Oxford : Oxford Archaeology, 2002, 27pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

The evaluation revealed the remains of walls, floors and basements belonging to 19th century properties that would have fronted Chain Street, to the east of the site. A flint wall that had been part of an earlier structure had been incorporated in one of the properties. This was abutted by a rammed chalk floor that was seen to be significantly earlier than one of the 19th century walls. Below this floor were dumped layers overlying medieval ditches and pits. [Au(abr)]

96-102 London Street, Reading, Berkshire. An Archaeological Evaluation

Hammond, S Reading : Thames Valley Archaeological Services, 2002, 22pp, colour pls, figs, tabs, refs

Work undertaken by: Thames Valley Archaeological Services

The evaluation revealed two medieval and some post-medieval pits. A gully and post-medieval wall were also encountered. One large pit was thought to be indicative of quarrying. Redeposited pottery was recovered from some of the later features. The street frontage had been wholly truncated by late post-medieval basements and service runs. [Au(abr)]

LAND AT HEATHCROFT MARSHLAND SQUARE, EMMER GREEN, CAVERSHAM

Land at Heathcroft Marshland Square, Emmer Green, Caversham. Archaeological Evaluation Report

Harding, P & Marriot, H Salisbury : Wessex Archaeology, 2002, 8pp, figs, tabs, refs

Work undertaken by: Wessex Archaeology

Three trenches were excavated across the site, to identify the potential for in situ palaeo-landsurfaces and deposits. These revealed gravel and sand layers consistent with the Caversham Channel, an ancient channel of the River Thames. Three extremely rolled Palaeolithic flint flakes were recovered, but it was concluded that the potential for in situ Palaeolithic material was low. [Au(abr)]

THE WARREN, CHAZEY COURT FARM, CAVERSHAM

The Warren, Chazey Court Farm, Caversham, Reading. Archaeological Evaluation Report

Dodds, D Oxford : Oxfröd Archaeology, 2002, 17pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

The evaluation revealed a series of linear features associated with low level agricultural activity of uncertain date, most probably related to field drainage or land reclamation. A possible hollow or pond was found and there was evidence for a phase of re-roofing at the farm in the form of tile scatters. Most deposits were undated, apart from a single deposit which contained 16th century pottery. [Au(abr)]
