**THE BUBBLE, MAUDLIN FARM, LISKEARD*****The Bubble, Maudlin Farm, Liskeard. Archaeological Evaluation***

Johns, C Truro : Cornwall Archaeological Unit, 2002, 30pp, pls, figs, tabs, refs

*Work undertaken by:* Cornwall Archaeological Unit

The Bubble was known to be the site of the medieval Leper Hospital. The evaluation revealed that large areas of the site had been truncated by modern development, but evidence of activity under a track and farm buildings was inferred. [Au(abr)]

**SCARCEWATER, CORNWALL*****A Report to Imerys: Scarcewater, Cornwall. An Archaeological Evaluation***

Taylor, S R &amp; Jones, A Truro : Cornwall Archaeological Unit, 2002, 49pp, figs, tabs, refs

*Work undertaken by:* Cornwall Archaeological Unit

Evaluation trenching was carried out in advance of the extension to a china clay tip. Eighteen trenches were placed in four of five areas previously subjected to a geophysical survey. Positive results were obtained, including the locating of a series of well-preserved prehistoric and medieval landscapes, of a settlement and/or ritual nature. [Au(abr)]

**TRETHERRAS SCHOOL, NEWQUAY*****Tretherras School, Newquay, Cornwall. Archaeological Evaluation***

Craze, N, Gossip, J &amp; Johns, C Truro : Cornwall Archaeological Unit, 2002, 37pp, pls, figs, tabs, refs

*Work undertaken by:* Cornwall Archaeological Unit

Four trenches were excavated in concordance with geophysical data retrieved in 1994. Significant archaeological remains were discovered. Trench 2 revealed a sub-circular enclosure, around 50m in diameter. Pottery helped to identify this as an Iron Age/Roman round [defended settlement]. Pits and post holes survived inside. Stone artefacts, daub fragments and a quernstone were also recovered. This site was thought to be of National Importance, as preservation was good and potential for further discoveries high. Other prehistoric activity was also inferred from pits, postholes and possible Bronze Age pottery. [Au(abr)]
