48-50 HIGH STREET***48-50 High Street, Uttoxeter***

Duncan, M Birmingham : Birmingham University Field Archaeology Unit, 2002, 20pp, colour pls, figs

Work undertaken by: Birmingham University Field Archaeology Unit

Three trial trenches were excavated on the site. A series of medieval and post-medieval deposits were recorded, truncated by terracing of the site. Medieval pits were identified truncated by later development of the site. A post-medieval wall and path were identified dividing the land in to two and remains were also found of 19th century ancillary buildings. [Au(abr)] *SMR primary record number:* 02357

JUNCTION OF SANDFORD STREET***Junction of Sandford and Swan Street and Swan Road, Lichfield***

Ramsey, E Birmingham : Birmingham University Field Archaeology Unit, 2002, 20pp, colour pls, figs, tabs

Work undertaken by: Birmingham University Field Archaeology Unit

Two trial trenches were excavated on the area of the proposed development. A layer and possible ditch of medieval date were identified, these were truncated by later layers. Clay lined pits were identified and are thought to be 16th century tanning pits. Evidence tanning was recovered in the form of worked bone and horn cores. Cellaring was only noted on part of the site. [Au(abr)]

THE SWAN HOTEL***The Swan Hotel, Lichfield***

Wainwright, J Clun : Marches Archaeology, 2002, 28pp, figs, tabs

Work undertaken by: Marches Archaeology

Two evaluation trenches were excavated at the rear of the hotel. Two medieval burgrave plots were defined, only one of which was possibly used for the medieval Swan Hotel. Medieval deposits were found on both burgrave plots and post holes and even though the excavations were carried out at the rear of the plots structural features such as wall foundations and post holes were identified. [Au(abr)] *SMR primary record number:* 07432

POTTAL POOL

Pottal Pool, Staffordshire

McPhillips, S & Elsworth, D Lancaster : Oxford Archaeology North, 2002, 39pp, colour pls, figs, tabs, refs

Work undertaken by: Oxford Archaeology North

17 evaluation trenches were placed across bank features identified in the assessment walkover. The evaluation showed these banks to mainly consist of tree roots and associated humic layers. One of these rows appears to have been planted and associated postholes beneath the bank excavated in an alignment consistent with a former boundary. [AIP]

LAND AT BROWSE ANTIQUES

Land at Browse Antiques, 127 Lichfield Road, Stafford

Martin, H Birmingham : Birmingham University Field Archaeology Unit, 2002, 12pp, figs, tabs

Work undertaken by: Birmingham University Field Archaeology Unit

A single trench was excavated on the site. A shallow linear feature, possibly a beam slot, a shallow pit and a post hole were identified. These were sealed by a layer containing medieval pottery. A post-medieval pit was also identified. [Au(abr)]
