HALL FARM, NORTH OCKENDON***An Archaeological Watching Brief at Hall Farm, North Ockendon***

Vaughan-Williams, A Twickenham : AOC Archaeology Group, 2002, 17pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

The watching brief involved the monitoring of the excavation of two service trenches, and the foundation trenches for a new building. The two service trenches revealed a sequence of foundation walls, along with a cobbled surface and a tiled floor, which were associated with the Manor House which previously stood on the site. The foundation trenches revealed a layer of building demolition down to the natural sand horizon. [Au(abr)] *SMR primary record number:* LAG 16/34

PETROL FILLING STATION, RONEO CORNER, ROMFORD***Replacement Petrol Filling Station, Roneo Corner, Romford, London Borough of Havering, Report on an Archaeological Watching Brief***

Stephenson, A Twickenham : AOC Archaeology Group, 2002, 10pp, figs, refs

Work undertaken by: AOC Archaeology Group

This document is a report on a watching brief conducted at a new development at Roneo Corner, Romford, in the London Borough of Havering, where the petrol filling station is being replaced by another with a new kiosk and underground tanks. Parts of the groundworks were monitored in the locations of both new installations and when sufficient had been observed to be sure that no significant archaeological remains were present, permission was obtained by CPM environmental to stop the watching brief. Naturally-formed river terrace gravels were found below a shallow depth of made ground consisting of modern garden soil type-material, dumping and subsoil.[Au]

ROMFORD GOLF COURSE, GILDEA PARK, ROMFORD***Romford golf Course, Gildea Park, Romford, RM2 5QB***

Bluer, D London : Museum of London Archaeology Service, 2002, 22pp, colour pls, figs, refs

Work undertaken by: Museum of London Archaeology Service

Two discrete disturbances to the Monument with a third on its alignment were dug with the intention of ascertaining the date and nature of the ridge. Hand excavation of the gravel metalling on one trench recovered several fragments of post-medieval brick, while other piece of circumstantial evidence also pointed away from a Roman attribution. [Au(abr)] *SMR primary record number:* LAG 16/182

SOUTH HALL FARM, RAINHAM

Report on an Archaeological Watching Brief Carried out at: South Hall Farm, Rainham, Essex

Palmer, D Twickenham : AOC Archaeology Group, 2002, 30pp, figs, tabs, refs

Work undertaken by: AOC Archaeology Group

An archaeological watching brief was undertaken by AOC Archaeology Group on Phases 5 and 6 of the South Hall Farm gravel extraction site at Rainham, Essex. The watching brief involved monitoring the machine stripping of the topsoil and subsoil across the site. A number of features dated to the Late Bronze Age were recorded. These included a ring ditch, pits and a small linear feature. A number of undated features were also recorded, along with tree throws and a post-medieval boundary ditch. Natural sandy gravel was recorded across the site. [Au]
