SIR JOHN ATKINS BUILDING, CAMPDEN HILL

Assessment of an Archaeological Excavation at the Sir John Atkins Building, Campden Hill, Royal Borough of Kensington and Chelsea, London W8

Bradley, T Brockley : Pre-Construct Archaeology Ltd, 2002, 49pp, figs, tabs, refs

Work undertaken by: Pre-Construct Archaeology Ltd

The excavation revealed a concentrated area of prehistoric and later activity cut into river terrace gravels. This included a large sub-rectangular feature and associated post holes and pits dating to the Early Iron Age. The Late Iron Age period was also represented by pits, stake holes and gullies as well as a north-south orientated ditch, with two further ditches and a pit also dating to the Roman period. The post-medieval period was represented by two east-west orientated intercutting gullies and the southern side of a quarry pit. [Au(abr)] *SMR primary record number:* 20/049

ST JOSEPH'S RC PRIMARY SCHOOL

An Archaeological Investigation at St Josephs RC Primary School, Cadogan Street, London SW3

Mayo, C Brockley : Pre-Construct Archaeology Ltd, 2002, 13pp, figs, refs

Work undertaken by: Pre-Construct Archaeology Ltd

The investigation was required after ground penetrating radar revealed a series of voids beneath the playground. An excavated grave showed the presence of two juvenile and possibly one adult burials within it. The excavated grave showed a direct link between the collapsed hole in the playground surface and the collapse of grave fill into a void found at the base of the excavation. [Au(adp)] *SMR primary record number:* LAG 20/082
