**BROOK INDUSTRIAL ESTATE, ORPINGTON***Watching Brief Report on Brook Industrial Estate, Orpington Retail Park, Sevenoaks Way, Orpington, Kent*

Perry, J &amp; Macgowan, K    Wimbledon : Sutton Archaeological Services, 2002, 22pp, figs, refs

*Work undertaken by:* Sutton Archaeological Services

The watching brief was carried out between Friday, 1st February and Friday, 8th February 2002, during the excavation of the northern main drain and the main foundation pier bases and trenches. Two possible floors of the earlier paper mill were found in one of the pier bases of the eastern wall for the new building. No archaeology or finds, other than modern, were found. [Au]

**ST JOHN RIGBY RC COLLEGE, WEST WICKHAM***The St John Rigby RC College, Layhams Road, West Wickham, London Borough of Bromley, BR4. An Archaeological Watching Brief*

Potter, G    London : Compass Archaeology, 2002, 33pp, colour pls, figs

*Work undertaken by:* Compass Archaeology

The watching brief has shown that the site area was heavily truncated by mid 19th century development. Nevertheless, the site revealed on feature of significance, in the form of the mortared flint and chalk wall foundation. This may have been contemporary with the construction of Wickham Court in the 1470s, and certainly is likely to relate to buildings shown on a plan in 1632. Moreover, the shape of the feature and historic map evidence both suggest that it may have formed a chimney base. There were no other significant remains on the site, although one piece of worked stone of probable 15th or 16th century date was recovered. [Au(adp)]

*Work undertaken by:* Museum of London Archaeology Service

A single archaeological cut feature was recorded during the excavation of Trench 1. The feature was interpreted as a refuse pit and contained a number of thick glass sherds, a number of 20th century ceramic sherds and frequent small fragments of ceramic building material. [Au(adp)]
