The Archaeological Practice Newcastle upon Tyne : The Archaeological Practice, 2002, 18pp,
colour pls, figs, refs

Work undertaken by: The Archaeological Practice

The only definable features of note were gullies of probably later medieval date cut into the boulder clay sub-soil at depths below 3.0m. The character of the archaeologically significant material excavated from the site, largely rotted and compressed organic matter, together with the absence of remains of build structures, suggests that in the medieval period this area formed the back plot to a residential property. The most notable finds were large sherds of later medieval, green-glazed pottery and a well-preserved fragment of a leather sandal or shoe, the latter indicating that part of the site had remained waterlogged. Stobbs, G Newcastle upon Tyne : Tyne & Wear Museums Archaeology Department, 2002, 30pp, figs, tabs, refs

Work undertaken by: Tyne & Wear Museums Archaeology Department

The watching brief revealed the partial remains of a rectilinear enclosure known from an aerial photograph taken in 1947, while the subsequent small scale excavation examined and recorded the profile of the enclosure ditch and some attendant features within the entrance way and the interior. No datable pottery was recovered, though environmental samples were taken from waterlogged material within the base of the ditch. The ditch terminal fill contained a fine single cup-marked stone. HEESTON BANK, KIRKWHELPINGTON

Heeston Bank, Kirkwhelpington, Northumberland: Archaeological Mitigation Recording by Topographic Survey

The Archaeological Practice Newcastle upon Tyne : The Archaeological Practice, 2003, 32pp, colour pls, pls, figs, tabs, refs
Work undertaken by: The Archaeological Practice

A topographic survey conducted in advance of road improvement works has found that traces of linear features running from south-west to north-east, underlie the holloways system aligned south-east to north-west. It was concluded that the various components documented during the assessment and recording phases of cultural heritage work at Heeston Bank formed part of a closely interrelated, well preserved historic rural landscape which merits further study.
