HAMPSHIRE SALTERNS

Hampshire Salterns. A Cartographic Study of the Hampshire Salt Industry

Wessex Archaeology Salisbury : Wessex Archaeology, 2002, 15pp, figs, refs

Work undertaken by: Wessex Archaeology

Large parts of coastal Hampshire, in the lee of the Isle of Wight, have been protected from destructive marine forces. This project aimed to survey the salt production areas, using digital mapping and historical sources. Many of the sites were post-medieval; of the examples that were not, it was suggested that more research needed to be undertaken into the form, function and development of these sites. [Au(adp)]

SILCHESTER INSULA IX

University of Reading Reading : University of Reading, 2002,
Work undertaken by: University of Reading

The end of the sixth season of our excavation in insula ix saw the completion of a total of 36 weeks of fieldwork since the project began in 1997. Here evidence is emerging of a very different town to that of the late Roman period with the number, complexity and lifespan of the early 'unplanned' buildings, and the date of the streets and, thereby, the street-grid. Houses continued to be built anew in masonry in the late first century on orientations which perpetuated a pre-street-grid arrangement.[Au(adp)]

THE VYNE, HAMPSHIRE

Report on an Archaeological Watching Brief of the Floors in the Chapel and Tomb Chamber at the Vyne, Hampshire

Martin, D & Knight, S Ditchling : Archaeology South-East, 2002, 32pp, figs, tabs, refs
Work undertaken by: Archaeology South-East

The excavations within the tomb chamber revealed a different sub-floor make up to that of the chapel. The entrance to the subterranean vault was not left open, but was sealed upon completion of the tomb chamber. The marble slabs incorporated within both the chapel and the tomb chamber floors showed clear signs of reuse. [Au(adp)]

ST LAWRENCE'S PRIMARY SCHOOL, ALTON

St Lawrence's Primary School, Alton. Archaeological Excavation

Barge, M Southampton : Gifford and Partners, 2002, 16pp, colour pls, figs, tabs, refs
Work undertaken by: Gifford and Partners

The site lay within the former boundary of the 12th century St Lawrence's Church, the site of a probable Saxon minster church. It was thought that the graveyard may have extended as far as the road running north of the school, but the investigation revealed no evidence of this. All features recorded dated to the

South East Region

construction of the school about 1840, with the exception of a small section of wall foundation, thought to be part of the earlier farm buildings that occupied the site from the 17th century. A small soakaway of large flints from the original school building was also recorded. [Au(abr)]

BISHOPS WALTHAMS PROJECT

Phase 1 Test Pit Report, Bishops Waltham Project, Bishops Waltham Palace, Hampshire. Archaeological Watching Brief

Hiller, J Oxford : Oxford Archaeology, 2002, 10pp, figs, tabs, refs

Work undertaken by: Oxford Archaeology

South East Region

This project was the first phase of the archaeological monitoring of geotechnical test-pits at the site of the Bishop's Waltham pond site. The watching brief revealed undated pond silt deposits overlying natural gravels at the base of each test pit. Part of the Mill Race channel to the 19th century mill was observed together with late structural remains probably those of demolished buildings at the site. The silts and structures were sealed beneath thick layers of dumped material deposited when the site was levelled in the 1970s. [Au(abr)]

THE FARLEY MOUNT MONUMENT, HURSLEY

Report on an Archaeological; Excavation at the Farley Mount Monument, Hursley Parish, near Winchester

Berkshire Archaeological Services Aldermaston : Berkshire Archaeological Services, 2002, 11pp, figs, tabs, refs

Work undertaken by: Berkshire Archaeological Services

The work was carried out in advance of a major renovation of the monument, which was said to be commemorative of a horse, allegedly buried beneath the mound. The monument was renovated in the 19th century, but its origin has been uncertain. The limited scale of the excavation was unable to fully ascertain its origin, but it was thought that it was unlikely to have been built before the 18th century, most probably in two phases. THE LILACS, WESTHILL ROAD NORTH, SOUTH WONSTON

The Lilacs, Westhill Road North, South Wonston. Report on Archaeological Watching Brief

Teague, S Winchester : Winchester Museums Service, 2002, 11pp, figs

Work undertaken by: Winchester Museums Service

The aim of the monitoring was to ensure that no damage was inflicted on a long barrow within the site. During the recording the north and south flanking ditches of the barrow, a Scheduled Ancient Monument, were plotted and recorded. [Au(abr)]
