PIPELINE YAVERLAND AND NINHAM'S WITHYBED WITH VENTOR TO SANDOWN AND BEMBRIDGE TO SANDOWN

Archaeological Investigations at Yaverland and Ninham's Withybed and along the Route of the Ventor to Sandown and Bembridge to Sandown Waste Water Pipelines

Trott, K Abingdon : RPS Planning, Transport and Environment, 2002, 55pp, figs, tabs, refs

Work undertaken by: RPS Planning, Transport and Environment

An archaeological watching brief, walkover survey with two areas of excavation on a c. 20 km pipeline cut located prehistoric flint assemblages from four sites, and a series of Bronze and Iron Age post holes near Ninham Withybed, Lake. A cobbled Roman period floor, wall foundations and other Roman materials were found near Yaverland. Early medieval post holes were also found near Yaverland and scatters of medieval pottery were found at four sites from possible manure scattering. The Victorian sea wall at Ventnor Esplanade was also investigated. [Au(adp)] *SMR primary record number:* 1520, 2627,

Archaeological periods represented: BA, EM, EPR, IA, MO
