42-46 BROAD STREET

42-46 Broad Street, Portsmouth. Report on the Archaeological Watching Brief

White, M & Laver, J : Southampton : Gifford and Partners, 2002, 10pp, figs

Work undertaken by: Gifford and Partners

The monitoring was carried out in the Old Town of Portsmouth, during the quay wall re-anchoring. A series of limestone blocks believed to be remnants of the earlier quay wall, the cellar walls of a late 18th of early 19th century building and two contemporary cobble surfaces were recorded. 9 ST JAMES STREET, PORTSEA

9 St. James's Street, Portsea, Portsmouth

Brading, R : Southampton : Southern Archaeological Services, 2002, 41pp, figs, tabs

Work undertaken by: Southern Archaeological Services

A watching brief was maintained on groundworks at the site. Modern deposits were observed sealing alluvial deposits that may have belonged to an 18th century mill pond. [Au(abr)]

9 ST JAMES'S STREET, PORTSEA

Summary Report on an Archaeological Watching Brief at 9 St James's Street, Portsea, Portsmouth

Southern Archaeological Services Southampton : Southern Archaeological Services, 2002, 37pp, figs, tabs, refs

Work undertaken by: Southern Archaeological Services

There was extensive early modern infill across the site. Below this were alluvial or marine deposits, thought to be related to the mill pond, which cartographic evidence had shown to exist. It was noted that the irregular road layout was due to the pond predating the road. [Au(abr)]

ARIADNE & PIAZZA, GUNWHARF QUAYS

Ariadne & Piazza, Gunwharf Quays, Portsmouth. Results of the Archaeological Watching Brief

Barge, M Southampton : Gifford and Partners, 2002, 13pp, colour pls, figs, refs

Work undertaken by: Gifford and Partners

Six test-pits were excavated to determine the presence of archaeological remains. Sections of the Old Gunwharf's quay wall and part of the Mill Redoubt wall were recorded, as well as a large stone and brick culvert. It was thought likely that this culvert acted as a sluice or overflow to the millpond and the tidal mill. The concrete foundations of the Commanding Ordnance Officer's quarters were observed, as well as part of the original Armoury building of Old Gunwharf which was demolished in the early 20th century. CANALSIDE BLOCKS, GUNWHARF

Canalside Blocks, Gunwharf, Portsmouth. Report on the Archaeological Watching Brief

Barge, M Southampton : Gifford and Partners, 2002, 25pp, colour pls, pls, figs, tabs, refs

Work undertaken by: Gifford and Partners

The site formed the northern edge of New Gunwharf, built between 1797 and 1810. The watching brief recorded a large number of features associated with the development of Gunwharf and the defence of the area. Part of the Sea Line Wall, built in the 1600s was revealed, as well as part of the moat. The Mill redoubt and King's Mill were recorded, as well as the 19th century quay wall. A slipway for small boats was evident. On New Gunwharf storage buildings had been built, as well as large machinery associated with naval ordnance. All pre-20th century buildings were removed by the end of the Second World War. [Au(abr)]

JOHN POUND CENTRE, ST JAMES STREET, PORTSEA

An Archaeological Watching Brief at John Pound Centre, St James Street, Portsea, Portsmouth, Hampshire

Currie, C K : CKC Archaeology, 2002, 24pp, colour pls, figs, tabs, refs
Work undertaken by: CKC Archaeology

There had been a suggestion that the area had been laid out to avoid areas of gravel extraction. Excavation revealed evidence for a late 19th century backland building of some size, possibly a workshop associated with a nearby foundry. No supporting evidence for this was found however. The design of the buildings suggested industrial or commercial use. [Au(abr)]

UNIVERSITY OF PORTSMOUTH, RICHMOND PLACE

An Archaeological Watching Brief at the New Business School, University of Portsmouth, Richmond Place, Portsmouth, Hants

Currie, C K C : CKC Archaeology, 2002, 22pp, figs, tabs, refs
Work undertaken by: CKC Archaeology

South East Region

The watching brief showed that the area had once been covered by the Town Mill Pond. There was little or no evidence for activity before the medieval period, when the mill was first mentioned. The site was largely redeveloped after Second World War bombing. No other archaeological remains were recorded. [Au(abr)]
