CHURCH FARM ENGINE HOUSE, EMERSONS GREEN

An Archaeological Watching Brief at Church Farm Engine House, Emersons Green, South Gloucestershire

Turner, J Bristol : Channel Archaeology, 2002, 18pp, colour pls, figs

Work undertaken by: Channel Archaeology

The watching brief was carried out to observe the landscaping of the spoil heap and winging house and reduction of the retaining wall in height. No archaeological remains were recovered. [Au(abr)]

GOLDEN VALLEY LANE, BITTON

Site at Golden Valley Lane, Bitton, South Gloucestershire. A Programme of Archaeological Desktop Study, Building Recoding and Trial Excavation

Avon Archaeological Unit Bristol : Avon Archaeological Unit, 2002, 53pp, colour pls, figs, tabs, refs

Work undertaken by: Avon Archaeological Unit

The desk-based assessment carried out as part of this project provided little hard evidence as to the development of the site. The excavation identified medieval features in many of the trenches, as well as extensive industrial waste of a later date. The medieval remains were thought to relate to the boundaries of a croft. Dating was accomplished by the recovery of in situ pottery finds. The absence of any Roman pottery or finds was thought to preclude the local assumption of a Roman origin for the site.

TOCKINGTON SEWAGE TREATMENT WORKS

Tockington Sewage Treatment Works, Tockington. Archaeological Watching Brief

Foundations Archaeology Swindon : Foundations Archaeology, 2003, 12pp, figs, refs

Work undertaken by: Foundations Archaeology

The monitoring was carried out during the laying of a sewage pipeline. A substantial 3rd/4th century pottery scatter and an undated linear cut were recorded, as well as a limited amount of unstratified medieval and post-medieval pottery. Preservation was considered favourable along the route of the pipeline. [Au(abr)]

WARMLEY HOUSE, WARMLEY

Warmley House, Warmley, South Gloucestershire. Archaeological Recording and Monitoring

Etheridge, D Bristol : Avon Archaeological Unit, 2002, 9pp, colour pls, figs, refs

Work undertaken by: Avon Archaeological Unit

South West Region

The project was undertaken to monitor the excavation of geotechnical test-pits and service trenches for a new extension. The site comprised the Scheduled Ancient Monument of Warmley Brass works, the world's first industrial brass foundry and site of national importance. Warmley House itself was a Listed Building. The remains of a former wall, were located, and thought to be from a structure attached to Warmley House. Industrial deposits were also located, but the general lack of features was related to the small scale of the excavations. [Au(abr)]
