Geophysical Surveys of Five NT Properties in NW Region

Crossland, J Cirencester : National Trust, 2002, 20pp, pls, figs

Work undertaken by: National Trust

A resistivity survey was carried out on the site. The geophysical survey clearly showed the outline of parterre garden below the lawn of the 17C mansion, although the circular form of the parterre is likely to be Victorian. [Au(adp)]

Castle Stede, Lancashire

GSB Prospection Bradford : GSB Prospection, 2002, 21pp, figs,

Work undertaken by: GSB Prospection

The gradiometer survey revealed several faint linear anomalies. The curving trends may be associated with a former field boundary. The resistance survey produced a series of parallel linear trends which are likely to indicate former cultivation. [Au(adp)]
