*Archaeological Geophysical Surveys on land to the west of Metcalfe Lane, Osbaldwick, City of York*

Noel, M J Consett : Geoquest, 2002, 24pp, figs, tabs

*Work undertaken by:* GeoQuest Associates

The gradiometer and resistivity survey was carried out in advance of a proposed housing development. The results confirmed the presence of well-preserved ridge and furrow. Several minor features of archaeological interest were also detected. An evaluation was recommended to fully interpret these features. [Au(adp)]

*Monk's Cross, York. Geophysical Survey*

Noel, M J Consett : GeoQuest Associates, 2002, 15pp, figs, tabs

*Work undertaken by:* Geoquest Associates

The gradiometer and resistivity surveys were carried out due to the discovery of two Roman camps at the site. Of particular significance was that traces, of stone-cored ramparts survived in the subsoil. Details of the layout of the camps were also noted. [Au(adp)]
