The authors regret that we have made a mistake in Table 2, in which the categories “obese” and “non-obese” were inadvertently switched. Specifically, the values in the first row should correspond to the “obese” category, and the values in the second row should correspond to the “non-obese” category. This error does not affect any conclusions of the work but is sufficiently important to require correction.

The authors would like to apologise for any inconvenience caused.

Table 2
Length of Stay Statistics by BMI Category

BMI Category	Count	Mean	Median	SD	95 % CI Lower	95 % CI Upper	P-value
Normal weight	6429	3.35	2	6.88	3.18	3.52	<0.001

(continued on next column)

Table 2 (continued)

BMI Category	Count	Mean	Median	SD	95 % CI Lower	95 % CI Upper	P-value
Overweight	15766	3.01	2	7.06	2.90	3.12	<0.001
Class I Obesity	15180	2.90	2	5.27	2.82	2.99	<0.001
Class II Obesity	8297	2.96	2	4.09	2.88	3.05	<0.001
Class III Obesity	2799	3.43	2	4.81	3.25	3.61	<0.001
Super obesity	237	3.65	3	3.73	3.18	4.13	<0.001
Obese (BMI > 40)	2894	3.44	2	4.77	3.26	3.61	<0.001
Not Obese (BMI ≤ 40)	45814	3.02	3	6.01	2.96	3.07	<0.001
